

FLEX REMOVER

THE SUPERPOWER THAT EVERYONE
WAS BEEN WAITING FOR

Did you apply a wrong letter?
Has a detail of your
application suddenly moved
and ruined your graphics?

**DON'T
PANIC!**

With **Flex Remover**
you can remove your heat
transfer vinyl and reapply
the new film correctly.

**HOW TO
APPLY?**

WITH ONLY

4 QUICK STEPS

YOU CAN RESTORE
YOUR GRAPHICS

STEP 1

Wear protective gloves.

STEP 2

Apply the Flex Remover liquid with the help of the dropper pipette (included) only on the area you want to remove. You can apply the liquid to both the front and back of the fabric.*

STEP 3

Remove the heat transfer vinyl with the help of tweezers. Wait the time necessary for the liquid to evaporate from the fabric (in the case of stains left by the Flex Remover, press the shirt for 2-3 seconds to eliminate them).

STEP 4

Proceed with the application of the correct graphics by following the instructions of the film used.

*For best results, apply Flex Remover only on the back of the design and only on the part you're trying to remove.
